Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(4). A new abstract of the disclosure is required and must be presented on a separate sheet, apart from any other text.

The disclosure is objected to because of the following informalities: Page 2, lines 3 and 4 refer to the merits of claim 1. Since the content of the claim may change during prosecution, reference to a claim number is not appropriate and the specific merits should be included in the specification. There is a minor spelling error on page 3, line 14: "where" should be "where".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Svean et al. U.S. Patent No. 6,567,524 B1.

Regarding claim 1, Svean discloses a hearing aid comprising a signal path with an input transducer (M1), a signal processor (E3) and an output transducer (SG), where an auxiliary input (13) is provided to the signal path, the signal processor being adapted to produce a compensation

signal capable of at least partly attenuating acoustic signals bypassing the signal path and entering the ear canal (See col. 5, lines 12-41).

Regarding claim 2, Svean further discloses the hearing aid further comprises at least one internal input transducer (M2) for obtaining a sound signal .within the ear canal, the internal input transducer being connected to the signal path (See col. 5, lines 12-23).

Regarding claim 3, Svean further discloses a switching means (E11) are provided for switching the signal processor to a state where the compensation signal is generated (See col. 7, lines 49-55).

Regarding claim 4, Svean further discloses the switching means are adapted for automatically generating the compensation signal upon receiving the auxiliary input (See col. 7, lines 53-55).
